

Outdoor Movable 3 side truck LED display

This new product which uses a Pixel pitch 12mm with Virtual resolution is an ideal solution for mobile advertising. The LED display are built into the body of the truck on all 3 sides with at most care to resist against shocks when being driven around. Applications range from live concerts, outdoor meetings, door - door advertising etc. Please E-mail us for more details and tech specs with prices.

SMD 3in1 Outdoor Display

A breakthrough in the technology of SMD 3in1. A 16mm, 20mm and 10mm SMD 3in1 that can be used on the outdoor with a brightness of 6000nits. This solves the problem of heavier led display's by using SMD 3in1 technology that can be used on the outdoor. Normally SMD's brightness is not more than 1600nits for indoor, so cannot be used outdoor in bright sunlight. The 16mm Outdoor SMD 3in1 is a breakthrough in overcoming the brightness barrier and providing a single solution for both indoor and outdoor purposes.
